DIGITALARMOUR

Real-Time Digital Arrest & Scam Detection Engine

Hackathon Pitch — Research & Statistics Pack | KSIT College 2025

THE CRISIS IN NUMBERS

India faces an unprecedented cybercrime epidemic. These are official, parliamentary-verified figures you can quote with full confidence:

₹1,935 Cr	1.23 Lakh	21x	17,718
Lost to Digital Arrest in 2024 alone (Parliament-confirmed)	**Cases in 2024** complaints on NCRP portal	**Loss Growth** from ₹91 Cr in 2022 to ₹1,935 Cr in 2024	**In just Jan–Feb 2025** cases, ₹210 Cr lost

Year-by-Year Explosion

Year	Cases Reported	Financial Losses
2022	39,925	₹91 Crore
2023	60,676	₹339 Crore (+272%)
2024	1,23,672	₹1,935 Crore (+471%)
Jan–Feb 2025 only	17,718	₹210 Crore

LOCAL IMPACT — KARNATAKA (Your Home State)

This data is extremely powerful for your KSIT pitch since you're building for this exact market:

- **Karnataka:** 641 digital arrest cases reported in Karnataka in 2024
- **₹109 Crore:** ₹109 crore in total losses — some of that money is from people like your families
- **Bengaluru:** 480 of those 641 cases were from Bengaluru alone
- **City losses:** ₹42.4 crore lost just in Bengaluru city
- **State rank:** Karnataka ranked 3rd in India for total cybercrime complaints (1.69 lakh in 2024)

HIGH-PROFILE CASES — PROOF IT HITS EVERYONE

These are real, documented cases that prove education alone isn't enough — detection tools are needed:

- **S.P. Oswal, 82, Chairman of Vardhman Group:** Lost ₹7 Crore in a 2-day scam with a fake virtual courtroom and a 'Supreme Court judge'
- **Dr. Ruchika Tandon, Neurologist, SGPIMS:** Lost ₹2.81 Crore — scammers posed as TRAI + CBI on Skype
- **Ex-Banker (Mumbai):** Lost ₹230 Crore ($2.6 million) — the largest known single-victim digital arrest fraud
- **67-year-old Hyderabad Woman & Daughters:** Kept in 17-day digital house arrest, lost ₹55 million
- **86-year-old Mumbai Woman:** Lost ₹20 Crore to digital arrest scammers
- **March 2025 — Karnataka Tragedy:** An elderly couple in Karnataka died by suicide after losing ₹50 lakh to scammers

The average loss per victim has risen from ₹22,826 in 2022 to ₹1,56,502 in 2024 — a 7x increase.

GOVERNMENT ACKNOWLEDGEMENT

> *"There is no system like digital arrest under the law. No government agency threatens individuals over the phone or video call. When in doubt — Stop, Think, and Act."* — PM Narendra Modi, Mann Ki Baat, October 27, 2024

- **Parliamentary Action:** MHA formed a High-Level Committee to probe digital arrest scams — October 30, 2024
- **Supreme Court:** Supreme Court directed CBI to conduct a pan-India investigation into digital arrest networks — late 2025
- **I4C Blocked:** I4C has blocked 83,668 WhatsApp accounts and 3,962 Skype IDs used for digital arrest fraud
- **Telecom Crackdown:** 7.81 lakh SIM cards and 2.08 lakh IMEI numbers blocked as of February 2025
- **Recovery Gap:** Government's Citizen Financial Cyber Fraud system has saved ₹4,386 crore from 1.4 million complaints — but only ₹60.52 Cr has actually been returned to victims

WHY EXISTING APPROACHES ARE FAILING

- **Education doesn't stop it:** Victims include Ph.D. holders, doctors, bankers, retired police officers — awareness campaigns aren't enough
- **Law enforcement can't recover money:** Only ₹60.52 Cr recovered out of ₹36,448 Cr total reported losses — less than 0.2% recovery rate

- **Young people are most at risk:** Average victim awareness score among undergraduates: just 58% (research confirmed)
- **International origin:** 45–46% of these scam operations originate from Cambodia, Myanmar, Laos — beyond Indian jurisdiction
- **Police capacity:** "As the number of cases rises, there is a need for more specialised staff" — cyber law expert Jayesh Bhandekar, Cyber Experts S&B Associates, Pune
- **AI-powered evolution:** Fraudsters can now use AI-generated voices and fake video backgrounds — making calls look 100% authentic

WHERE DIGITALARMOUR FITS

DigitalArmour is the real-time first line of defence — catching the scam BEFORE the victim transfers money.

Current Reality	With DigitalArmour
Victim receives call → panics → transfers money → reports to 1930 → case registered → barely any money recovered	Suspicious message/call received → paste into DigitalArmour → SCAM DETECTED with explanation → call 1930 proactively → money never transferred

THE PSYCHOLOGY (Why It Works on Smart People)

- **Authority Trust:** 79% of Indians trust their government to do the right thing (vs 47% in Australia, 41% in USA) — Edelman Trust Barometer 2025
- **Cultural Factor:** Indians score highest globally on 'acquiescence bias' — tendency to comply with authority figures — 2005 cross-cultural study, 51 countries
- **Information Warfare:** Scammers know your Aadhaar number, address, bank details before calling — making it feel real
- **Isolation Tactic:** Victims are isolated on video calls for hours or days — psychological manipulation breaks resistance
- **Not an IQ Test:** A real neurologist and a senior police officer have both been victimised — it's not about intelligence

MARKET & IMPACT OPPORTUNITY

- **TAM:** India had 22.68 lakh cybercrime complaints in 2024 — 5x growth since 2021
- **Money at Stake:** Total reported cyber fraud losses since NCRP inception: ₹36,448 crore — and growing
- **Underreporting:** 1 in 5 UPI users has faced some form of fraud — and over half don't report it
- **2025 Projection:** If current trends continue: projected ₹1.2 lakh crore annual losses — 0.7% of India's GDP

- **Inclusive Design:** DigitalArmour works offline, in local languages (easily extensible), with zero data shared — ideal for Bharat

YOUR CLOSING PITCH LINE

India loses ₹1,935 crore a year to digital arrest scams. The Supreme Court is investigating. The PM has addressed the nation. But recovery rate is less than 0.2%. DigitalArmour doesn't chase the money after it's gone — it stops the transfer before it happens.

No Indian law permits digital arrest. When in doubt — hang up and call 1930.
